

**Worksheet 2. Reading: Dinosaurs**

Read the passage. Then decide whether the sentences below are True or False.  
Circle the answer.

### Dinosaurs

Millions of years ago, there weren't any people. But there were dinosaurs.

Dinosaurs were reptiles, and most kinds came from eggs. There were many kinds of dinosaurs. Dinosaurs lived on land. They didn't fly, and they didn't live in the water.

Some dinosaurs ate only plants. Some dinosaurs ate only meat. Some walked on two legs. Some walked on four.

Some ran fast, and some moved slowly.

Some had thick skin with bumps, and some had primitive feathers. Maybe the dinosaurs with feathers were the ancestors of today's birds.

The dinosaurs dominated the earth for a long time, but they mysteriously became extinct 65 million years ago.

1. There were people on earth 65 million years ago. True / False
2. Dinosaurs were reptiles. True / False
3. Most dinosaurs came from eggs. True / False
